A Consona ERP Solution **Consona**™

Compiere® Mobile Warehouse
Accurate. Fast. Efficient.

Compiere Mobile Warehouse, a Consona ERP solution, enables companies to utilize modern handheld devices to streamline warehouse operations and improve efficiencies. Operators are now able to receive, put-away, pick and ship materials more quickly, efficiently, and accurately than with manual data entry methods.

Compiere Mobile Warehouse increases efficiency and streamlines operations with handheld-solutions for warehouse operators.

Warehouse Operations

Inbound Operations

Outbound Operations

Compiere Mobile Warehouse Benefits

ACCURATE
- Minimize or eliminate errors
- Real-time updates of material movement

FAST
- Scan and confirm with barcode scanner
- Accelerate receipt and return processing
- Minimize or eliminate paper based transactions

EFFICIENT
- Minimal manual input
- Easy-to-use interface
- Streamline inbound, warehousing, and outbound operations

INTUITIVE INTERFACE

Compiere Mobile Warehouse offers an intuitive interface running on Windows mobile devices, enabling ease of use, and rapid adoption by warehouse operators. With a modern Windows Mobile UI look and feel, your operators can perform multiple functions – from receiving to shipping. Training is minimal allowing you to improve efficiencies quickly and easily. In addition, your operators can be quickly directed from task-to-task using the warehouse rules defined in Compiere Warehouse Management.

INBOUND OPERATIONS

Compiere Mobile Warehouse is completely integrated with Compiere Warehouse Management, a sophisticated application designed for high volume warehouse operations. Utilizing hand-held devices, operators can scan receipts that are automatically applied to one or multiple purchase orders and generate directed putaway tasks based on product

characteristics, quantities received, stocking locations, and optimal travel sequence.

WAREHOUSE OPERATIONS

Compiere Mobile Warehouse provides the ability to utilize hand-held devices to replenish zones, locators, and optimize space utilization by moving material based on location visits, product velocity, zone configuration, and movement tasks.

OUTBOUND OPERATIONS

Compiere mobile warehouse allows you to pick products for order fulfillment in an efficient and optimized manner by minimizing operator travel time through the warehouse. You can choose between various picking methods such as discrete order picking or cluster picking. Compiere Mobile Warehouse adheres to Compiere Warehouse Management picking rules setup in the system. Hand-held devices are utilized to record the appropriate transactions into Compiere Warehouse Management

Developed and Licensed by *Activate*, a Compiere Development Partner.

Compiere® Mobile Warehouse

Summary of Compiere Mobile Warehouse Capabilities
